Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

PREFACE

Reasons for Issuing ED 11/08

The Auditing and Assurance Standards Board (AUASB) is proposing to issue Auditing Standard ASA 330 *The Auditor's Responses to Assessed Risks (Revised and Redrafted)* pursuant to the requirements of the legislative provisions and the Strategic Direction explained below.

The *Corporate Law Economic Reform Program (Audit Reform and Corporate Disclosure) Act 2004* (the CLERP 9 Act) established the AUASB as an independent statutory body under section 227A of the *Australian Securities and Investments Commission Act 2001* (ASIC Act), as from 1 July 2004. Under section 336 of the *Corporations Act 2001* the AUASB may make Auditing Standards for the purposes of the corporations legislation. These Auditing Standards are legislative instruments under the *Legislative Instruments Act 2003*.

The International Auditing and Assurance Standards Board (IAASB), an independent standard-setting board of the International Federation of Accountants (IFAC), has undertaken a programme to redraft, in clarity format, the entire suite of International Standards on Auditing (ISAs). In some cases, and in accordance with normal practice, the ISAs have been revised in addition to being redrafted. The redrafted ISAs are effective for audits of financial statements for periods beginning on or after 15th December 2009.

Under the Strategic Direction given to the AUASB by the Financial Reporting Council (FRC), the AUASB is required to have regard to any programme initiated by the IAASB for the revision and enhancement of the ISAs and to make appropriate consequential amendments to the Australian Auditing Standards. Accordingly, the AUASB has decided to revise and redraft the Australian Auditing Standards (ASAs) using the redrafted ISAs as a base.

~~ED 11/08 conforms with ISA 330 *The Auditor's Responses to Assessed Risks*, issued by the International Auditing and Assurance Standards Board~~

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

Main Proposals

This proposed Auditing Standard establishes mandatory Requirements and provides Application and Other Explanatory Material regarding the auditor's responsibility to design and implement responses to the assessed risks of material misstatement in a financial report audit.

Proposed Operative Date

It is intended that this proposed Auditing Standard will be operative for financial reporting periods commencing on or after 1 January 2010.

Main changes from existing ASA 330 *The Auditor's Procedures in Response to Assessed Risks (April 2006)*

The main differences between this proposed Auditing Standard and the Standard that it supersedes, ASA 330 *The Auditor's Procedures in Response to Assessed Risks (April 2006)*, are included in the Tables of Differences provided as an attachment to this Exposure Draft.

Request for Comments

Comments are invited on this Exposure Draft of the proposed re-issuance of Auditing Standard (ASA 330) *The Auditor's Procedures in Response to Assessed Risks* by no later than 31 August 2008. The AUASB is seeking comments on the main changes from the existing ASA 330. In addition, respondents are asked to consider and respond to the following questions:

1. Have applicable laws and regulations been appropriately addressed in the proposed standard?
2. Are there any references to laws or regulations which have been omitted?
3. Are there any laws or regulations that may, or do, prevent or impede the application of the proposed standard, or may conflict with the proposed standard?
4. What, if any, are the additional significant costs to/benefits for auditors and the business community arising from compliance with the main changes to the Requirements of this proposed Auditing Standard? If there are significant costs, do these outweigh the benefits to the users of audit services?

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

5. Are there any other significant public interest matters that constituents wish to raise?

The AUASB prefers that respondents express a clear opinion on whether the main changes to the Requirements of this proposed Auditing Standard are supported and that this opinion be supplemented by detailed comments, whether supportive or critical, on the above matters. The AUASB regards both supportive and critical comments as essential to a balanced review of the Auditing Standard.

Draft

Proposed Auditing Standard ASA 330
***The Auditor's Responses to Assessed Risks* (Revised and Redrafted)**
(Re-issuance of ASA 330)

AUTHORITY STATEMENT

The Auditing and Assurance Standards Board (AUASB) makes this Auditing Standard ASA 330 *The Auditor's Responses to Assessed Risks* (Revised and Redrafted) pursuant to section 227B of the *Australian Securities and Investments Commission Act 2001* and section 336 of the *Corporations Act 2001*.

This Auditing Standard is to be read in conjunction with ASA 100 *Preamble to AUASB Standards*, which sets out the intentions of the AUASB on how the Auditing Standards are to be understood, interpreted and applied.

AUDITING STANDARD ASA 330

The Auditor's Responses to Assessed Risks (Revised and Redrafted)

Application

- Aus 0.1 This Auditing Standard applies to:
- (a) an audit of a financial report for a financial year, or an audit of a financial report for a half-year, in accordance with Part 2M.3 of the *Corporations Act 2001*; and
 - (b) an audit of a financial report for any other purpose.
- Aus 0.2 This Auditing Standard also applies, as appropriate, to an audit of other financial information.

Operative Date

- Aus 0.3 This Auditing Standard is operative for financial reporting periods commencing on or after 1 January 2010.

Introduction

Scope of this ASA

1. This Auditing Standard (ASA) deals with the auditor's responsibility to design and implement responses to the risks of material misstatement identified and assessed by the auditor in accordance with ASA 315, "*Identifying and Assessing Risks of Material Misstatement Through Understanding the Entity and Its Environment*" (Revised and Redrafted) in a financial report audit.

Effective Date

2. [Deleted by the AUASB. Refer Aus 0.3]

Objective

3. The objective of the auditor is to obtain sufficient appropriate audit evidence about the assessed risks of material misstatement, through designing and implementing appropriate responses to those risks.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

Definitions

4. For purposes of the ASAs, the following terms have the meanings attributed below:
- (a) Substantive procedure – An audit procedure designed to detect material misstatements at the assertion level. Substantive procedures comprise:
 - (i) Tests of details (of classes of transactions, account balances, and disclosures), and
 - (ii) Substantive analytical procedures.
 - (b) Test of controls – An audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.

Requirements

Overall Responses

5. The auditor shall design and implement overall responses to address the assessed risks of material misstatement at the financial report level. (Ref: Para. A1-A3)

Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Assertion Level

6. The auditor shall design and perform further audit procedures whose nature, timing, and extent are based on and are responsive to the assessed risks of material misstatement at the assertion level. (Ref: Para. A4-A8)
7. In designing the further audit procedures to be performed, the auditor shall:
- (a) Consider the reasons for the assessment given to the risk of material misstatement at the assertion level for each class of transactions, account balance, and disclosure, including:
 - (i) The likelihood of material misstatement due to the particular characteristics of the relevant class of transactions, account balance, or disclosure (i.e., the inherent risk); and

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- (ii) Whether the risk assessment takes account of relevant controls (i.e., the control risk), thereby requiring the auditor to obtain audit evidence to determine whether the controls are operating effectively (i.e., the auditor intends to rely on the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures); and (Ref: Para. A9-A18)
- (b) Obtain more persuasive audit evidence the higher the auditor's assessment of risk. (Ref: Para. A19)

Tests of Controls

8. The auditor shall design and perform tests of controls to obtain sufficient appropriate audit evidence as to the operating effectiveness of relevant controls when:
- (a) The auditor's assessment of risks of material misstatement at the assertion level includes an expectation that the controls are operating effectively (i.e., the auditor intends to rely on the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures); or
 - (b) Substantive procedures alone cannot provide sufficient appropriate audit evidence at the assertion level. (Ref: Para. A20-A24)
9. In designing and performing tests of controls, the auditor shall obtain more persuasive audit evidence the greater the reliance the auditor places on the effectiveness of a control. (Ref: Para. A25)

Nature and Extent of Tests of Controls

10. In designing and performing tests of controls, the auditor shall:
- (a) Perform other audit procedures in combination with enquiry to obtain audit evidence about the operating effectiveness of the controls, including:
 - (i) How the controls were applied at relevant times during the period under audit.
 - (ii) The consistency with which they were applied.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

(iii) By whom or by what means they were applied.
(Ref: Para. A26-29)

(b) Determine whether the controls to be tested depend upon other controls (indirect controls), and if so, whether it is necessary to obtain audit evidence supporting the effective operation of those indirect controls. (Ref: Para. A30-31)

Timing of Tests of Controls

11. The auditor shall test controls for the particular time, or throughout the period, for which the auditor intends to rely on those controls, subject to paragraphs 12 and 15 below, in order to provide an appropriate basis for the auditor's intended reliance. (Ref: Para. A32)

Using audit evidence obtained during an interim period

12. When the auditor obtains audit evidence about the operating effectiveness of controls during an interim period, the auditor shall:

- (a) Obtain audit evidence about significant changes to those controls subsequent to the interim period; and
- (b) Determine the additional audit evidence to be obtained for the remaining period. (Ref: Para. A33-A34)

Using audit evidence obtained in previous audits

13. In determining whether it is appropriate to use audit evidence about the operating effectiveness of controls obtained in previous audits, and, if so, the length of the time period that may elapse before retesting a control, the auditor shall consider the following:

- (a) The effectiveness of other elements of internal control, including the control environment, the entity's monitoring of controls, and the entity's risk assessment process;
- (b) The risks arising from the characteristics of the control, including whether it is manual or automated;
- (c) The effectiveness of general IT-controls;
- (d) The effectiveness of the control and its application by the entity, including the nature and extent of deviations in the application of the control noted in previous audits, and

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- whether there have been personnel changes that significantly affect the application of the control;
- (e) Whether the lack of a change in a particular control poses a risk due to changing circumstances; and
 - (f) The risks of material misstatement and the extent of reliance on the control. (Ref: Para. A35)
14. If the auditor plans to use audit evidence from a previous audit about the operating effectiveness of specific controls, the auditor shall establish the continuing relevance of that evidence by obtaining audit evidence about whether significant changes in those controls have occurred subsequent to the previous audit. The auditor shall obtain this evidence by performing enquiry combined with observation or inspection, to confirm the understanding of those specific controls, and:
- (a) If there have been changes that affect the continuing relevance of the audit evidence from the previous audit, the auditor shall test the controls in the current audit. (Ref: Para. A36)
 - (b) If there have not been such changes, the auditor shall test the controls at least once in every third audit, and shall test some controls each audit to avoid the possibility of testing all the controls on which the auditor intends to rely in a single audit period with no testing of controls in the subsequent two audit periods. (Ref: Para. A37-39)

Controls over significant risks

15. When the auditor plans to rely on controls over a risk the auditor has determined to be a significant risk, the auditor shall test those controls in the current period.

Evaluating the Operating Effectiveness of Controls

16. When evaluating the operating effectiveness of relevant controls, the auditor shall evaluate whether misstatements that have been detected by substantive procedures indicate that controls are not operating effectively. The absence of misstatements detected by substantive procedures, however, does not provide audit evidence that controls related to the assertion being tested are effective. (Ref: Para. A40)

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

17. When deviations from controls upon which the auditor intends to rely are detected, the auditor shall make specific enquiries to understand these matters and their potential consequences, and shall determine whether:
- (a) The tests of controls that have been performed provide an appropriate basis for reliance on the controls;
 - (b) Additional tests of controls are necessary; or
 - (c) The potential risks of misstatement need to be addressed using substantive procedures. (Ref: Para. A41)
18. The auditor shall evaluate whether, on the basis of the audit work performed, the auditor has identified a material weakness in the operating effectiveness of controls.
19. The auditor shall communicate material weaknesses in internal control identified during the audit on a timely basis to management at an appropriate level of responsibility and, as required by ASA 260, "*Communication with Those Charged with Governance*," (Revised and Redrafted) with those charged with governance (unless all of those charged with governance are involved in managing the entity).

Substantive Procedures

20. Irrespective of the assessed risks of material misstatement, the auditor shall design and perform substantive procedures for each material class of transactions, account balance, and disclosure. (Ref: Para. A42-A47)

Substantive Procedures Related to the Financial Report Closing Process

21. The auditor's substantive procedures shall include the following audit procedures related to the financial report closing process:
- (a) Agreeing or reconciling the financial report with the underlying accounting records; and
 - (b) Examining material journal entries and other adjustments made during the course of preparing the financial report. (Ref: Para. A48)

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

Substantive Procedures Responsive to Significant Risks

22. When the auditor has determined that an assessed risk of material misstatement at the assertion level is a significant risk, the auditor shall perform substantive procedures that are specifically responsive to that risk. When the approach to a significant risk consists only of substantive procedures, those procedures shall include tests of details. (Ref: Para. A49)

Aus 22.1 Where the auditor plans to use audit evidence from the performance of substantive procedures in a prior audit, the auditor shall perform audit procedures during the current period to establish the continuing relevance of the audit evidence. (Ref: Para. A50)

Timing of Substantive Procedures

23. When substantive procedures are performed at an interim date, the auditor shall cover the remaining period by performing:

- (a) Substantive procedures, combined with tests of controls for the intervening period; or
- (b) If the auditor determines that it is sufficient, further substantive procedures only,

that provide a reasonable basis for extending the audit conclusions from the interim date to the period end. (Ref: Para. A51-A53)

24. If misstatements that the auditor did not expect when assessing the risks of material misstatement are detected at an interim date, the auditor shall evaluate whether the related assessment of risk and the planned nature, timing, or extent of substantive procedures covering the remaining period need to be modified. (Ref: Para. A54)

Adequacy of Presentation and Disclosure

25. The auditor shall perform audit procedures to evaluate whether the overall presentation of the financial report, including the related disclosures, is in accordance with the applicable financial reporting framework. (Ref: Para. A55)

Evaluating the Sufficiency and Appropriateness of Audit Evidence

26. Based on the audit procedures performed and the audit evidence obtained, the auditor shall evaluate before the conclusion of the audit

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

whether the assessments of the risks of material misstatement at the assertion level remain appropriate. (Ref: Para. A56-57)

27. The auditor shall conclude whether sufficient appropriate audit evidence has been obtained. In forming an opinion, the auditor shall consider all relevant audit evidence, regardless of whether it appears to corroborate or to contradict the assertions in the financial report. (Ref: Para. A58)
28. If the auditor has not obtained sufficient appropriate audit evidence as to a material financial report assertion, the auditor shall attempt to obtain further audit evidence. If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor shall express a qualified opinion or a disclaimer of opinion.

Documentation

29. The auditor shall document:
- (a) The overall responses to address the assessed risks of material misstatement at the financial report level, and the nature, timing, and extent of the further audit procedures performed;
 - (b) The linkage of those procedures with the assessed risks at the assertion level; and
 - (c) The results of the audit procedures, including the conclusions where these are not otherwise clear. (Ref: Para. A59)
30. If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in previous audits, the auditor shall document the conclusions reached about relying on such controls that were tested in a previous audit.
31. The auditors' documentation shall demonstrate that the financial report agrees or reconciles with the underlying accounting records.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

Application and Other Explanatory Material

Overall Responses (Ref: Para. 5)

- A1. Overall responses to address the assessed risks of material misstatement at the financial report level may include:
- Emphasising to the audit team the need to maintain professional scepticism.
 - Assigning more experienced staff or those with special skills or using experts.
 - Providing more supervision.
 - Incorporating additional elements of unpredictability in the selection of further audit procedures to be performed.
 - Making general changes to the nature, timing, or extent of audit procedures, for example: performing substantive procedures at the period end instead of at an interim date; or modifying the nature of audit procedures to obtain more persuasive audit evidence.
- A2. The assessment of the risks of material misstatement at the financial report level, and thereby the auditor's overall responses, is affected by the auditor's understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and thus, for example, allow the auditor to conduct some audit procedures at an interim date rather than at the period end. Weaknesses in the control environment, however, have the opposite effect; for example, the auditor may respond to an ineffective control environment by:
- Conducting more audit procedures as of the period end rather than at an interim date.
 - Obtaining more extensive audit evidence from substantive procedures.
 - Increasing the number of locations to be included in the audit scope.
 - Aus A2.1 Modifying the nature of audit procedures to obtain more persuasive audit evidence.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- A3. Such considerations, therefore, have a significant bearing on the auditor's general approach, for example, an emphasis on substantive procedures (substantive approach), or an approach that uses tests of controls as well as substantive procedures (combined approach).

Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Assertion Level

The Nature, Timing, and Extent of Further Audit Procedures (Ref: Para. 6)

- A4. The auditor's assessment of the identified risks at the assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. For example, (as appropriate and notwithstanding the requirements of this ASA)¹ the auditor may determine that:
- (a) Only by performing tests of controls may the auditor achieve an effective response to the assessed risk of material misstatement for a particular assertion;
 - (b) Performing only substantive procedures is appropriate for particular assertions and, therefore, the auditor excludes the effect of controls from the relevant risk assessment. This may be because the auditor's risk assessment procedures have not identified any effective controls relevant to the assertion, or because testing controls would be inefficient and therefore the auditor does not intend to rely on the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures; or
 - (c) A combined approach using both tests of controls and substantive procedures is an effective approach.
- A5. The nature of an audit procedure refers to its purpose (i.e., test of controls or substantive procedure) and its type (i.e., inspection, observation, enquiry, confirmation, recalculation, re-performance, or analytical procedure). The nature of the audit procedures is of most importance in responding to the assessed risks.
- A6. Timing of an audit procedure refers to when it is performed, or the period or date to which the audit evidence applies.

¹ For example, as required by paragraph 20, irrespective of the approach selected, the auditor designs and performs substantive procedures for each significant class of transactions, account balance, and disclosure.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- A7. Extent of an audit procedure refers to the quantity to be performed, for example, a sample size or the number of observations of a control activity.
- A8. Designing and performing further audit procedures whose nature, timing, and extent are based on and are responsive to the assessed risks of material misstatement at the assertion level provides a clear linkage between the auditors' further audit procedures and the risk assessment.

Responding to the Assessed Risks at the Assertion Level (Ref: Para. 7(a))

Nature

- A9. The auditor's assessed risks may affect both the types of audit procedures to be performed and their combination. For example, when an assessed risk is high, the auditor may confirm the completeness of the terms of a contract with the counterparty, in addition to inspecting the document. Further, certain audit procedures may be more appropriate for some assertions than others. For example, in relation to revenue, tests of controls may be most responsive to the assessed risk of misstatement of the completeness assertion, whereas substantive procedures may be most responsive to the assessed risk of misstatement of the occurrence assertion.
- A10. The reasons for the assessment given to a risk are relevant in determining the nature of audit procedures. For example, if an assessed risk is lower because of the particular characteristics of a class of transactions without consideration of the related controls, then the auditor may determine that substantive analytical procedures alone provide sufficient appropriate audit evidence. On the other hand, if the assessed risk is lower because of internal controls, and the auditor intends to base the substantive procedures on that low assessment, then the auditor performs tests of those controls, as required by paragraph 8(a). This may be the case, for example, for a class of transactions of reasonably uniform, non-complex characteristics that are routinely processed and controlled by the entity's information system.

Timing

- A11. The auditor may perform tests of controls or substantive procedures at an interim date or at the period end. The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to, or at, the period end rather than at an earlier date, or to perform

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). This is particularly relevant when considering the response to the risks of fraud. For example, the auditor may conclude that, when the risks of intentional misstatement or manipulation have been identified, audit procedures to extend audit conclusions from interim date to the period end would not be effective.

- A12. On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters.
- A13. In addition, certain audit procedures can be performed only at or after the period end, for example:
- Agreeing the financial report to the accounting records;
 - Examining adjustments made during the course of preparing the financial report; and
 - Procedures to respond to a risk that, at the period end, the entity may have entered into improper sales contracts, or transactions may not have been finalised.
- A14. Further relevant factors that influence the auditor's consideration of when to perform audit procedures include the following:
- The control environment.
 - When relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times).
 - The nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may wish to examine contracts available on the date of the period end).
 - The period or date to which the audit evidence relates.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

Extent

- A15. The extent of an audit procedure judged necessary is determined after considering the materiality, the assessed risk, and the degree of assurance the auditor plans to obtain. When a single purpose is met by a combination of procedures, the extent of each procedure is considered separately. In general, the extent of audit procedures increases as the risk of material misstatement increases. For example, in response to the assessed risk of material misstatement due to fraud, increasing sample sizes or performing substantive analytical procedures at a more detailed level may be appropriate. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk.
- A16. The use of computer-assisted audit techniques (CAATs) may enable more extensive testing of electronic transactions and account files, which may be useful when the auditor decides to modify the extent of testing, for example, in responding to the risks of material misstatement due to fraud. Such techniques can be used to select sample transactions from key electronic files, to sort transactions with specific characteristics, or to test an entire population instead of a sample.

Considerations specific to public sector entities

- A17. For the audits of public sector entities, the audit mandate and any other special auditing requirements may affect the auditor's consideration of the nature, timing and extent of further audit procedures.

Considerations specific to smaller entities

- A18. In the case of smaller entities, there may not be many control activities that could be identified by the auditor, or the extent to which their existence or operation have been documented by the entity may be limited. In such cases, it may be more efficient for the auditor to perform further audit procedures that are primarily substantive procedures. In some rare cases, however, the absence of control activities or of other components of control may make it impossible to obtain sufficient appropriate audit evidence.

Higher Assessments of Risk (Ref: Para 7(b))

- A19. When obtaining more persuasive audit evidence because of a higher assessment of risk, the auditor may increase the quantity of the evidence, or obtain evidence that is more relevant or reliable, e.g.,

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

by placing more emphasis on obtaining third party evidence or by obtaining corroborating evidence from a number of independent sources.

Tests of Controls

Designing and Performing Tests of Controls (Ref: Para. 8)

- A20. Tests of controls are performed only on those controls that the auditor has determined are suitably designed to prevent, or detect and correct, a material misstatement in an assertion. If substantially different controls were used at different times during the period under audit, each is considered separately.
- A21. Testing the operating effectiveness of controls is different from obtaining an understanding of and evaluating the design and implementation of controls. However, the same types of audit procedures are used. The auditor may, therefore, decide it is efficient to test the operating effectiveness of controls at the same time as evaluating their design and determining that they have been implemented.
- A22. Further, although some risk assessment procedures may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, the auditor's risk assessment procedures may have included:
- Inquiring about management's use of budgets.
 - Observing management's comparison of monthly budgeted and actual expenses.
 - Inspecting reports pertaining to the investigation of variances between budgeted and actual amounts.

These audit procedures provide knowledge about the design of the entity's budgeting policies and whether they have been implemented, but may also provide audit evidence about the effectiveness of the operation of budgeting policies in preventing or detecting material misstatements in the classification of expenses.

- A23. In addition, the auditor may design a test of controls to be performed concurrently with a test of details on the same transaction. Although the purpose of a test of controls is different from the purpose of a test of details, both may be accomplished concurrently by

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

performing a test of controls and a test of details on the same transaction, also known as a dual-purpose test. For example, the auditor may design, and evaluate the results of, a test to examine an invoice to determine whether it has been approved and to provide substantive audit evidence of a transaction. A dual-purpose test is designed and evaluated by considering each purpose of the test separately.

- A24. In some cases, as discussed in ASA 315 (Revised and Redrafted), the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence at the assertion level. This may occur when an entity conducts its business using IT and no documentation of transactions is produced or maintained, other than through the IT system. In such cases, paragraph 8(b) requires the auditor to perform tests of relevant controls.

Audit Evidence and Intended Reliance (Ref: Para. 9)

- A25. A higher level of assurance may be sought about the operating effectiveness of controls when the approach adopted consists primarily of tests of controls, in particular where it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures.

Nature and Extent of Tests of Controls

Other audit procedures in combination with enquiry (Ref: Para. 10(a))

- A26. Enquiry alone is not sufficient to test the operating effectiveness of controls. Accordingly, other audit procedures are performed in combination with enquiry. In this regard, enquiry combined with inspection or re-performance may provide more assurance than enquiry and observation, since an observation is pertinent only at the point in time at which it is made.
- A27. The nature of the particular control influences the type of procedure required to obtain audit evidence about whether the control was operating effectively. For example, if operating effectiveness is evidenced by documentation, the auditor may decide to inspect it to obtain audit evidence about operating effectiveness. For other controls, however, documentation may not be available or relevant. For example, documentation of operation may not exist for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as control activities performed by a computer. In such circumstances,

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

audit evidence about operating effectiveness may be obtained through enquiry in combination with other audit procedures such as observation or the use of CAATs.

Extent of tests of controls

A28. When more persuasive audit evidence is needed regarding the effectiveness of a control, it may be appropriate to increase the extent of testing of the control. As well as the degree of reliance on controls, matters the auditor may consider in determining the extent of tests of controls include the following:

- The frequency of the performance of the control by the entity during the period.
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.
- The expected rate of deviation from a control.
- The relevance and reliability of the audit evidence to be obtained regarding the operating effectiveness of the control at the assertion level.
- The extent to which audit evidence is obtained from tests of other controls related to the assertion.

ASA 530, "*Audit Sampling and Other Means of Testing*" (Revised and Redrafted) contains further guidance on the extent of testing.

A29. Because of the inherent consistency of IT processing, it may not be necessary to increase the extent of testing of an automated control. An automated control can be expected to function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Once the auditor determines that an automated control is functioning as intended (which could be done at the time the control is initially implemented or at some other date), the auditor may consider performing tests to determine that the control continues to function effectively. Such tests might include determining that:

- Changes to the program are not made without being subject to the appropriate program change controls,
- The authorised version of the program is used for processing transactions, and

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- Other relevant general controls are effective.

Such tests also might include determining that changes to the programs have not been made, as may be the case when the entity uses packaged software applications without modifying or maintaining them. For example, the auditor may inspect the record of the administration of IT security to obtain audit evidence that unauthorised access has not occurred during the period.

Testing of indirect controls (Ref: Para. 10(b))

- A30. In some circumstances, it may be necessary to obtain audit evidence supporting the effective operation of indirect controls. For example, when the auditor decides to test the effectiveness of a user review of exception reports detailing sales in excess of authorised credit limits, the user review and related follow up is the control that is directly of relevance to the auditor. Controls over the accuracy of the information in the reports (for example, the general IT-controls) are described as 'indirect' controls.
- A31. Because of the inherent consistency of IT processing, audit evidence about the implementation of an automated application control, when considered in combination with audit evidence about the operating effectiveness of the entity's general IT-controls (in particular, change controls), may also provide substantial audit evidence about its operating effectiveness.

Timing of Tests of Controls

Intended period of reliance (Ref: Para. 11)

- A32. Audit evidence pertaining only to a point in time may be sufficient for the auditor's purpose, for example, when testing controls over the entity's physical inventory counting at the period end. If, on the other hand, the auditor intends to rely on a control over a period, tests that are capable of providing audit evidence that the control operated effectively at relevant times during that period are appropriate. Such tests may include tests of the entity's monitoring of controls.

Using audit evidence obtained during an interim period (Ref: Para. 12)

- A33. Relevant factors in determining what additional audit evidence to obtain about controls that were operating during the period remaining after an interim period, include:

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- The significance of the assessed risks of material misstatement at the assertion level.
- The specific controls that were tested during the interim period, and significant changes to them since they were tested, including changes in the information system, processes, and personnel.
- The degree to which audit evidence about the operating effectiveness of those controls was obtained.
- The length of the remaining period.
- The extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls.
- The control environment.

A34. Additional audit evidence may be obtained, for example, by extending tests of controls over the remaining period or testing the entity's monitoring of controls.

Using audit evidence obtained in previous audits (Ref: Para. 13)

A35. In certain circumstances, audit evidence obtained from previous audits may provide audit evidence where the auditor performs audit procedures to establish its continuing relevance. For example, in performing a previous audit, the auditor may have determined that an automated control was functioning as intended. The auditor may obtain audit evidence to determine whether changes to the automated control have been made that affect its continued effective functioning through, for example, enquiries of management and the inspection of logs to indicate what controls have been changed. Consideration of audit evidence about these changes may support either increasing or decreasing the expected audit evidence to be obtained in the current period about the operating effectiveness of the controls.

Controls that have changed from previous audits (Ref: Para. 14(a))

A36. Changes may affect the relevance of the audit evidence obtained in previous audits such that there may no longer be a basis for continued reliance. For example, changes in a system that enable an entity to receive a new report from the system probably do not affect the relevance of audit evidence from a previous audit, however, a

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

change that causes data to be accumulated or calculated differently does affect it.

Controls that have not changed from previous audits (Ref: Para. 14(b))

A37. The auditor's decision on whether to rely on audit evidence obtained in previous audits for controls that:

- (a) Have not changed since they were last tested; and
- (b) Are not controls that mitigate a significant risk,

is a matter of professional judgement. In addition, the length of time between retesting such controls is also a matter of professional judgement, but is required by paragraph 14 (b) to be at least once in every third year.

A38. In general, the higher the risk of material misstatement, or the greater the reliance on controls, the shorter the time period elapsed, if any, is likely to be. Factors that may decrease the period for retesting a control, or result in not relying on audit evidence obtained in previous audits at all, include the following:

- A weak control environment.
- Weak monitoring of controls.
- A significant manual element to the relevant controls.
- Personnel changes that significantly affect the application of the control.
- Changing circumstances that indicate the need for changes in the control.
- Weak general IT-controls.

A39. When there are a number of controls for which the auditor intends to rely on audit evidence obtained in previous audits, testing some of those controls in each audit provides corroborating information about the continuing effectiveness of the control environment. This contributes to the auditor's decision about whether it is appropriate to rely on audit evidence obtained in previous audits.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

Evaluating the Operating Effectiveness of Controls (Ref: Para. 16-19)

- A40. A material misstatement detected by the auditor's procedures may indicate the existence of a material weakness in internal control.
- A41. The concept of effectiveness of the operation of controls recognises that some deviations in the way controls are applied by the entity may occur. Deviations from prescribed controls may be caused by such factors as changes in key personnel, significant seasonal fluctuations in volume of transactions and human error. The detected rate of deviation, in particular in comparison with the expected rate, may indicate that the control cannot be relied on to reduce risk at the assertion level to that assessed by the auditor.

Substantive Procedures (Ref: Para. 20)

- A42. Paragraph 20 requires the auditor to design and perform substantive audit procedures for each material class of transactions, account balance, and disclosure, irrespective of the assessed risks of material misstatement. This requirement reflects the facts that: (i) the auditor's assessment of risk is judgemental and so may not identify all risks of material misstatement; and (ii) there are inherent limitations to internal control, including management override.

Nature and Extent of Substantive Procedures

- A43. Depending on the circumstances, the auditor may determine that:
- Performing only substantive analytical audit procedures will be sufficient to reduce audit risk to an acceptably low level. For example, where the auditor's assessment of risk is supported by audit evidence from tests of controls.
 - Only tests of details are appropriate.
 - A combination of substantive analytical audit procedures and tests of details are most responsive to the assessed risks.
- A44. Substantive analytical audit procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. ASA 520, "*Analytical Procedures*" (Revised and Redrafted), establishes requirements and provides guidance on the application of analytical procedures during an audit.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- A45. The nature of the risk and assertion is relevant to the design of tests of details. For example, tests of details related to the existence or occurrence assertion may involve selecting from items contained in a financial report amount and obtaining the relevant audit evidence. On the other hand, tests of details related to the completeness assertion may involve selecting from items that are expected to be included in the relevant financial statement amount and investigating whether they are included.
- A46. Because the assessment of the risk of material misstatement takes account of internal control, the extent of substantive audit procedures may need to be increased when the results from tests of controls are unsatisfactory. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.
- A47. In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size. However, other matters are also relevant, including whether it is more effective to use other selective means of testing. See ASA 530 (Revised and Redrafted) for additional guidance.
- Substantive Procedures Related to the Financial Report Closing Process (Ref: Para. 21(b))
- A48. The nature, and also the extent, of the auditor's examination of journal entries and other adjustments depends on the nature and complexity of the entity's financial reporting process and the related risks of material misstatement.

Substantive Procedures Responsive to Significant Risks (Ref: Para. 22)

- A49. Paragraph 22 of this ASA requires the auditor to perform substantive audit procedures that are specifically responsive to risks the auditor has determined to be significant risks. For example, if the auditor identifies that management is under pressure to meet earnings expectations, there may be a risk that management is inflating sales by improperly recognising revenue related to sales agreements with terms that preclude revenue recognition or by invoicing sales before shipment. In these circumstances, the auditor may, for example, design external confirmations not only to confirm outstanding amounts, but also to confirm the details of the sales agreements, including date, any rights of return and delivery terms. In addition, the auditor may find it effective to supplement such external confirmations with enquiries of non-financial personnel in the entity regarding any changes in sales agreements and delivery terms.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

Substantive audit procedures related to significant risks are most often designed to obtain audit evidence with high reliability.

Timing of Substantive Procedures (Ref: Para. 23-24)

A50. In most cases, audit evidence from a previous audit's substantive audit procedures provides little or no audit evidence for the current period. There are, however, exceptions, e.g., a legal opinion obtained in a previous audit related to the structure of a securitisation to which no changes have occurred, may be relevant in the current period. In such cases, it may be appropriate to use audit evidence from a previous audit's substantive procedures if that evidence and the related subject matter have not fundamentally changed, and audit procedures have been performed during the current period to establish its continuing relevance.

Using audit evidence obtained during an interim period (Ref: Para. 23)

A51. In some circumstances, the auditor may determine that it is effective to perform substantive audit procedures at an interim date, and to compare and reconcile information concerning the balance at the period end with the comparable information at the interim date to:

- (a) Identify amounts that appear unusual,
- (b) Investigate any such amounts, and
- (c) Perform substantive analytical audit procedures or tests of details to test the intervening period.

A52. Performing substantive audit procedures at an interim date without undertaking additional audit procedures at a later date increases the risk that the auditor will not detect misstatements that may exist at the period end. This risk increases as the remaining period is lengthened. Factors such as the following may influence whether to perform substantive audit procedures at an interim date:

- The control environment and other relevant controls.
- The availability at a later date of information necessary for the auditor's procedures.
- The purpose of the substantive procedure.
- The assessed risk of material misstatement.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- The nature of the class of transactions or account balance and related assertions.
 - The ability of the auditor to perform appropriate substantive audit procedures or substantive audit procedures combined with tests of controls to cover the remaining period in order to reduce the risk that misstatements that may exist at the period end will not be detected.
- A53. Factors such as the following may influence whether to perform substantive analytical audit procedures with respect to the period between the interim date and the period end:
- Whether the period end balances of the particular classes of transactions or account balances are reasonably predictable with respect to amount, relative significance, and composition.
 - Whether the entity's procedures for analysing and adjusting such classes of transactions or account balances at interim dates and for establishing proper accounting cut-offs are appropriate.
 - Whether the information system relevant to financial reporting will provide information concerning the balances at the period end and the transactions in the remaining period that is sufficient to permit investigation of:
 - (a) Significant unusual transactions or entries (including those at or near the period end),
 - (b) Other causes of significant fluctuations, or expected fluctuations that did not occur, and
 - (c) Changes in the composition of the classes of transactions or account balances.

Misstatements detected at an interim date (Ref: Para. 24)

- A54. When the auditor concludes that the planned nature, timing, or extent of substantive audit procedures covering the remaining period need to be modified as a result of unexpected misstatements detected at an interim date, such modification may include extending or repeating the audit procedures performed at the interim date at the period end.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

Adequacy of Presentation and Disclosure (Ref: Para. 25)

A55. Evaluating the overall presentation of the financial report, including the related disclosures, relates to whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information, and the form, arrangement, and content of the financial statements and their appended notes. This includes, for example, the terminology used, the amount of detail given, the classification of items in the report, and the basis of amounts set forth.

Evaluating the Sufficiency and Appropriateness of Audit Evidence (Ref: Para. 26-28)

A56. An audit of a financial report is a cumulative and iterative process. As the auditor performs planned audit procedures, the audit evidence obtained may cause the auditor to modify the nature, timing, or extent of other planned audit procedures. Information may come to the auditor's attention that differs significantly from the information on which the risk assessment was based. For example,

- The extent of misstatements that the auditor detects by performing substantive audit procedures may alter the auditor's judgement about the risk assessments and may indicate a material weakness in internal control.
- The auditor may become aware of discrepancies in accounting records, or conflicting or missing evidence.
- Analytical audit procedures performed at the overall review stage of the audit may indicate a previously unrecognised risk of material misstatement.

In such circumstances, the auditor may need to re-evaluate the planned audit procedures, based on the revised consideration of assessed risks for all or some of the classes of transactions, account balances, or disclosures and related assertions. ASA 315 (Revised and Redrafted) contains further guidance on revising the auditor's risk assessment.

A57. The auditor cannot assume that an instance of fraud or error is an isolated occurrence. Therefore, the consideration of how the detection of a misstatement affects the assessed risks of material misstatement is important in determining whether the assessment remains appropriate.

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

A58. The auditor's judgement as to what constitutes sufficient appropriate audit evidence is influenced by such factors as the following:

- Significance of the potential misstatement in the assertion and the likelihood of its having a material effect, individually or aggregated with other potential misstatements, on the financial report.
- Effectiveness of management's responses and controls to address the risks.
- Experience gained during previous audits with respect to similar potential misstatements.
- Results of audit procedures performed, including whether such audit procedures identified specific instances of fraud or error.
- Source and reliability of the available information.
- Persuasiveness of the audit evidence.
- Understanding of the entity and its environment, including the entity's internal control.

Documentation (Ref: Para. 29)

A59. The form and extent of audit documentation is a matter of professional judgement, and is influenced by the nature, size and complexity of the entity and its internal control, availability of information from the entity and the audit methodology and technology used in the audit.

Conformity with International Standards on Auditing

Except as noted below, this Auditing Standard conforms with International Standard on Auditing ISA 330, *The Auditor's Responses to Assessed Risks*, issued by the International Auditing and Assurance Standards Board ("IAASB"), an independent standard-setting board of the International Federation of Accountants ("IFAC").

Paragraphs that have been added to this Standard (and do not appear in the text of the equivalent ISA) are identified with the prefix "Aus".

The main difference between this Auditing Standard and ISA 330 is:

Proposed Auditing Standard ASA 330
The Auditor's Responses to Assessed Risks (Revised and Redrafted)
(Re-issuance of ASA 330)

- This Auditing Standard includes the following Requirement that is not included as a Requirement in ISA 330:
 - Where the auditor plans to use audit evidence from the performance of substantive procedures in a prior audit, the auditor shall perform audit procedures during the current period to establish the continuing relevance of the audit evidence. [Aus 22.1]

Compliance with this Auditing Standard enables compliance with ISA 330.

Draft

Tables of Differences — ASA 330 (Revised and Redrafted) and Extant ASA 330

Base Standard

ISA 330 (*The Auditor's Responses to Assessed Risks*) is used as the base standard for the purpose of re-drafting this proposed ASA. The base standard has been amended to account for the following matters:

- Australian Laws and Regulations;
- Changes considered necessary because the Auditing Standard is a legislative instrument made under the *Corporations Act 2001*; and
- Changes considered necessary in the public interest.

Summary of Main Differences — ASA 330 and Extant ASA 330

The table below details the main differences between the proposed Standard and Extant ASA 330 (excluding editorial amendments).

ASA (Revised and Redrafted) Requirements not in Extant ASA

Item #	ASA Para. #	ASA (Revised and Redrafted) Requirements	Commentary
Objectives			
1	3	The objective of the auditor is to obtain sufficient appropriate audit evidence about the assessed risks of material misstatement, through designing and implementing appropriate responses to those risks.	New Objective section included.
Definitions			
2	4	For purposes of the ASAs, the following terms have the meanings attributed below: (a) Substantive procedure – An audit procedure designed to detect material misstatements at the assertion level. Substantive procedures comprise: (i) Tests of details [of classes of transactions, account balances, and disclosures], and (ii) Substantive analytical procedures.	New Definitions section included, which is consistent with Extant ASA.

Item #	ASA Para. #	ASA (Revised and Redrafted) Requirements	Commentary
		(b) Test of controls – An audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.	
Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Assertion Level			
3	7	<p>In designing the further audit procedures to be performed, the auditor shall:</p> <p>(a) Consider the reasons for the assessment given to the risk of material misstatement at the assertion level for each class of transactions, account balance, and disclosure, including:</p> <ul style="list-style-type: none"> (i) The likelihood of material misstatement due to the particular characteristics of the relevant class of transactions, account balance, or disclosure (i.e., the inherent risk); and (ii) Whether the risk assessment takes account of relevant controls (i.e., the control risk), thereby requiring the auditor to obtain audit evidence to determine whether the controls are operating effectively (i.e., the auditor intends to rely on the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures); and (Ref: Para. A9-A18) <p>(b) Obtain more persuasive audit evidence the higher the auditor’s assessment of risk. (Ref: Para. A19)</p>	<p>Shaded Text are New Requirements that are an elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 13 —equivalent Explanatory Guidance]</p> <p>Bold Text provides further Requirement clarification, which is an elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 19 —equivalent Explanatory Guidance].</p>
<i>Tests of Controls</i>			
4	9	In designing and performing tests of controls, the auditor shall obtain more persuasive audit evidence the greater the reliance the auditor places on the effectiveness of a control. (Ref: Para. A25)	<p>New Requirement is elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 37—equivalent Explanatory Guidance].</p>

Item #	ASA Para. #	ASA (Revised and Redrafted) Requirements	Commentary
5	10	<p>In designing and performing tests of controls, the auditor shall:</p> <p>(a) Perform other audit procedures in combination with enquiry to obtain audit evidence about the operating effectiveness of the controls, including:</p> <ul style="list-style-type: none"> (i) How the controls were applied at relevant times during the period under audit. (ii) The consistency with which they were applied. (iii) By whom or by what means they were applied. (Ref: Para. A26-29) <p>(b) Determine whether the controls to be tested depend upon other controls (indirect controls), and if so, whether it is necessary to obtain audit evidence supporting the effective operation of those indirect controls. (Ref: Para. A30-31)</p>	<p>Shaded Text are New Requirements that are an elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 35—equivalent Explanatory Guidance].</p> <p>Bold Text is a New Requirement that is an elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 41—equivalent Explanatory Guidance].</p>
6	11	<p>The auditor shall test controls for the particular time, or throughout the period, for which the auditor intends to rely on those controls, subject to paragraphs 12 and 15 below, in order to provide an appropriate basis for the auditor’s intended reliance. (Ref: Para. A32)</p>	<p>New Requirement is elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 46—equivalent Explanatory Guidance]</p>
7	12	<p>When the auditor obtains audit evidence about the operating effectiveness of controls during an interim period, the auditor shall:</p> <p>(a) Obtain audit evidence about significant changes to those controls subsequent to the interim period; and</p> <p>(b) Determine the additional audit evidence to be obtained for the remaining period. (Ref: Para. A33-A34)</p>	<p>Shaded Text is a New Requirement that is an elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 49—equivalent Explanatory Guidance].</p>
8	13	<p>In determining whether it is appropriate to use audit evidence about the operating effectiveness of controls obtained in previous audits, and, if so, the length of the time period that may elapse before retesting a control, the auditor shall consider the following:</p> <p>(a) The effectiveness of other elements of internal control, including the control environment, the entity’s monitoring of controls, and the entity’s risk assessment process;</p>	<p>Shaded Text is a New Requirement with no Extant ASA equivalent.</p> <p>Not inconsistent with current Australian practice.</p>

Item #	ASA Para. #	ASA (Revised and Redrafted) Requirements	Commentary
		<p>(b) The risks arising from the characteristics of the control, including whether it is manual or automated;</p> <p>(c) The effectiveness of general IT-controls;</p> <p>(d) The effectiveness of the control and its application by the entity, including the nature and extent of deviations in the application of the control noted in previous audits, and whether there have been personnel changes that significantly affect the application of the control;</p> <p>(e) Whether the lack of a change in a particular control poses a risk due to changing circumstances; and</p> <p>(f) The risks of material misstatement and the extent of reliance on the control. (Ref: Para. A35)</p>	<p>Unshaded text is a New Requirement that is an elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 58—equivalent Explanatory Guidance].</p>
9	16	<p>When evaluating the operating effectiveness of relevant controls, the auditor shall evaluate whether misstatements that have been detected by substantive procedures indicate that controls are not operating effectively. The absence of misstatements detected by substantive procedures, however, does not provide audit evidence that controls related to the assertion being tested are effective. (Ref: Para. A40)</p>	<p>New Requirement is an elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 45—equivalent Explanatory Guidance].</p>
10	17	<p>When deviations from controls upon which the auditor intends to rely are detected, the auditor shall make specific inquiries to understand these matters and their potential consequences, and shall determine whether:</p> <p>(a) The tests of controls that have been performed provide an appropriate basis for reliance on the controls;</p> <p>(b) Additional tests of controls are necessary; or</p> <p>(c) The potential risks of misstatement need to be addressed using substantive procedures. (Ref: Para. A41)</p>	<p>New Requirement is an elevation of Extant ASA Explanatory Guidance.</p> <p>[Extant ASA 330 para 92—equivalent Explanatory Guidance].</p>

Item #	ASA Para. #	ASA (Revised and Redrafted) Requirements	Commentary
11	18	The auditor shall evaluate whether, on the basis of the audit work performed, the auditor has identified a material weakness in the operating effectiveness of controls.	New Requirement with no Extant ASA equivalent. Not inconsistent with current Australian practice.
12	19	The auditor shall communicate material weaknesses in internal control identified during the audit on a timely basis to management at an appropriate level of responsibility and, as required by ASA 260 “Communication with Those Charged with Governance”, with those charged with governance (unless all of those charged with governance are involved in managing the entity).	Shaded Text is New Requirement with no Extant ASA equivalent. (Unshaded Text is equivalent to Extant ASA Requirement at [para 44]). Not inconsistent with current Australian practice.
<i>Substantive Procedures</i>			
13	24	If misstatements that the auditor did not expect when assessing the risks of material misstatement are detected at an interim date, the auditor shall evaluate whether the related assessment of risk and the planned nature, timing, or extent of substantive procedures covering the remaining period need to be modified. (Ref: Para. A54)	Shaded Text is New Requirement with no Extant ASA equivalent. Not inconsistent with current Australian practice. Unshaded Text is Elevation of Extant ASA Explanatory Guidance. [Extant ASA 330 para 83—equivalent Explanatory Guidance]
Evaluating the Sufficiency and Appropriateness of Audit Evidence			
14	27	The auditor shall conclude whether sufficient appropriate audit evidence has been obtained. In forming an opinion, the auditor shall consider all relevant audit evidence, regardless of whether it appears to corroborate or to contradict the assertions in the financial report. (Ref: Para. A58)	Shaded Text is a New Requirement that is an elevation of Extant ASA Explanatory Guidance. [Extant ASA 330 para 94—equivalent Explanatory Guidance]

Item #	ASA Para. #	ASA (Revised and Redrafted) Requirements	Commentary
Documentation			
15	31	The auditors' documentation shall demonstrate that the financial report agrees or reconciles with the underlying accounting records.	<p>New Requirement with no Extant ASA equivalent.</p> <p>Not inconsistent with current Australian practice—Extant ASA Requirement at [para 69] requires the auditor to agree the financial report or reconcile with the underlying accounting records.</p>

Draft
