## PREFACE

### Reasons for Issuing ED 13/09

The Auditing and Assurance Standards Board (AUASB) is proposing to re-issue Auditing Standard ASA 402 *Audit Considerations Relating to Entities Using Service Organisations* pursuant to the requirements of the legislative provisions and the Strategic Direction explained below.

The AUASB is an independent statutory board of the Australian Government established under section 227A of the *Australian Securities and Investments Commission Act 2001*, as amended (ASIC Act). Under section 336 of the *Corporations Act 2001*, the AUASB may make Australian Auditing Standards for the purposes of the corporations legislation. These Auditing Standards are legislative instruments under the *Legislative Instruments Act 2003*.

The International Auditing and Assurance Standards Board (IAASB), an independent standard-setting board of the International Federation of Accountants (IFAC), has undertaken a programme to redraft, in “clarity” format, the entire suite of International Standards on Auditing (ISAs). In some cases, and in accordance with normal practice, the ISAs have been revised in addition to being redrafted. The redrafted ISAs are effective for audits of financial statements for periods beginning on or after 15 December 2009.

Under the Strategic Direction given to the AUASB by the Financial Reporting Council (FRC), the AUASB is required to have regard to any programme initiated by the IAASB for the revision and enhancement of the ISAs and to make appropriate consequential amendments to the Australian Auditing Standards. Accordingly, the AUASB has decided to revise and redraft the Australian Auditing Standards using the equivalent redrafted ISAs.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

## **Main Proposals**

This proposed Auditing Standard establishes mandatory Requirements and provides Application and Other Explanatory Material regarding the user auditor's responsibility to obtain sufficient appropriate audit evidence when a user entity uses the services of one or more service organisations.

## **Proposed Operative Date**

It is intended that this proposed Auditing Standard will be operative for financial reporting periods commencing on or after 1 January 2010.

## **Main changes from existing ASA 402 *Audit Considerations Relating to Entities Using Service Organisations* (April 2006)**

The main differences between this proposed Auditing Standard and the Auditing Standard that it supersedes, ASA 402 *Audit Considerations Relating to Entities Using Service Organisations* (April 2006), are included in the Tables of Differences provided as an attachment to this Exposure Draft.

## **Request for Comments**

Comments are invited on this Exposure Draft of the proposed re-issuance of Auditing Standard ASA 402, *Audit Considerations Relating to Entities Using Service Organisations* by no later than 18 May 2009. The AUASB is seeking comments on the main changes from the existing ASA 402. In addition, respondents are asked to consider and respond to the following questions:

1. Have applicable laws and regulations been appropriately addressed in the proposed standard?
2. Are there any references to relevant laws or regulations that have been omitted?
3. Are there any laws or regulations that may, or do, prevent or impede the application of the proposed standard, or may conflict with the proposed standard?
4. What, if any, are the additional significant costs to/benefits for auditors and the business community arising from compliance with the main changes to the Requirements of this proposed Auditing

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

Standard? If there are significant costs, do these outweigh the benefits to the users of audit services?

5. Are there any other significant public interest matters that constituents wish to raise?

The AUASB prefers that respondents express a clear opinion on whether the main changes to the Requirements of this proposed Auditing Standard are supported and that this opinion be supplemented by detailed comments, whether supportive or critical, on the above matters. The AUASB regards both supportive and critical comments as essential to a balanced review of the Auditing Standard.

**AUASB Information Note**

The IAASB has announced completion of the “Clarity” project. While all currently known conforming amendments are incorporated into this Exposure Draft, readers are advised that the AUASB may decide to make further conforming amendments and other editorial changes.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

**AUTHORITY STATEMENT**

The Auditing and Assurance Standards Board (AUASB) makes this Auditing Standard ASA 402 *Audit Considerations Relating to an Entity Using a Service Organisation* (Revised and Redrafted) pursuant to section 227B of the *Australian Securities and Investments Commission Act 2001* and section 336 of the *Corporations Act 2001*.

This Auditing Standard is to be read in conjunction with ASA 101 *Preamble to Australian Auditing Standards*, which sets out the intentions of the AUASB on how the Australian Auditing Standards, operative for financial reporting periods commencing on or after 1 January 2010, are to be understood, interpreted and applied.

## AUDITING STANDARD ASA 402

### *Audit Considerations Relating to an Entity Using a Service Organisation (Revised and Redrafted)*

#### Application

- Aus 0.1 This Auditing Standard applies to:
- (a) an audit of a financial report for a financial year, or an audit of a financial report for a half-year, in accordance with the *Corporations Act 2001*; and
  - (b) an audit of a financial report, or a complete set of financial statements, for any other purpose.
- Aus 0.2 This Auditing Standard also applies, as appropriate, to an audit of other historical financial information.

#### Operative Date

- Aus 0.3 This Auditing Standard is operative for financial reporting periods commencing on or after 1 January 2010.

#### Introduction

##### Scope of this ASA

1. This Auditing Standard deals with the user auditor's responsibility to obtain sufficient appropriate audit evidence when a user entity uses the services of one or more service organisations. Specifically, it expands on how the user auditor applies ASA 315 (Revised and Redrafted)<sup>1</sup> and ASA 330 (Revised and Redrafted)<sup>2</sup> in obtaining an understanding of the user entity, including internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement and in designing and performing further audit procedures responsive to those risks.

---

<sup>1</sup> See ASA 315 (Revised and Redrafted) *Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment*.

<sup>2</sup> See ASA 330 (Revised and Redrafted) *The Auditor's Responses to Assessed Risks*.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

2. Many entities outsource aspects of their business to organisations that provide services ranging from performing a specific task under the direction of an entity to replacing an entity's entire business units or functions, such as the tax compliance function. Many of the services provided by such organisations are integral to the entity's business operations; however, not all those services are relevant to the audit.
3. Services provided by a service organisation are relevant to the audit of a user entity's financial report when those services, and the controls over them, are part of the user entity's information system, including related business processes, relevant to financial reporting. Although most controls at the service organisation are likely to relate to financial reporting, there may be other controls that may also be relevant to the audit, such as controls over the safeguarding of assets. A service organisation's services are part of a user entity's information system, including related business processes, relevant to financial reporting if these services affect any of the following:
  - (a) The classes of transactions in the user entity's operations that are significant to the user entity's financial report;
  - (b) The procedures, within both information technology (IT) and manual systems, by which the user entity's transactions are initiated, recorded, processed, corrected as necessary, transferred to the general ledger and reported in the financial report;
  - (c) The related accounting records, either in electronic or manual form, supporting information and specific accounts in the user entity's financial report that are used to initiate, record, process and report the user entity's transactions; this includes the correction of incorrect information and how information is transferred to the general ledger;
  - (d) How the user entity's information system captures events and conditions, other than transactions, that are significant to the financial report;
  - (e) The financial reporting process used to prepare the user entity's financial report, including significant accounting estimates and disclosures; and

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

- (f) Controls surrounding journal entries, including non-standard journal entries used to record non-recurring, unusual transactions or adjustments.
- 4. The nature and extent of work to be performed by the user auditor regarding the services provided by a service organisation depend on the nature and significance of those services to the user entity and the relevance of those services to the audit.
- 5. This Auditing Standard does not apply to services provided by financial institutions that are limited to processing, for an entity's account held at the financial institution, transactions that are specifically authorised by the entity, such as the processing of cheque account transactions by a bank or the processing of securities transactions by a broker. In addition, this Auditing Standard does not apply to the audit of transactions arising from proprietary financial interests in other entities, such as partnerships, corporations and joint ventures, when proprietary interests are accounted for and reported to interest holders.

**Effective Date**

- 6. [Deleted by the AUASB. Refer Aus 0.3]

**Objectives**

- 7. The objectives of the user auditor, when the user entity uses the services of a service organisation, are:
  - (a) To obtain an understanding of the nature and significance of the services provided by the service organisation and their effect on the user entity's internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement; and
  - (b) To design and perform audit procedures responsive to those risks.

**Definitions**

- 8. For the purposes of the Australian Auditing Standards, the following terms have the meanings attributed below:

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

- (a) Complementary user entity controls means controls that the service organisation assumes, in the design of its service, will be implemented by user entities, and which, if necessary to achieve control objectives, are identified in the description of its system.
- (b) Report on the description and design of controls at a service organisation (referred to in this Auditing Standard as a type 1 report) means a report that comprises:
  - (i) A description, prepared by management of the service organisation, of the service organisation's system, control objectives and related controls that have been designed and implemented as at a specified date; and
  - (ii) A report by the service auditor with the objective of conveying reasonable assurance that includes the service auditor's opinion on the description of the service organisation's system, control objectives and related controls and the suitability of the design of the controls to achieve the specified control objectives.
- (c) Report on the description, design, and operating effectiveness of controls at a service organisation (referred to in this Auditing Standard as a type 2 report) means a report that comprises:
  - (i) A description, prepared by management of the service organisation, of the service organisation's system, control objectives and related controls, their design and implementation as at a specified date or throughout a specified period and, in some cases, their operating effectiveness throughout a specified period; and
  - (ii) A report by the service auditor with the objective of conveying reasonable assurance that includes:
    - a. The service auditor's opinion on the description of the service organisation's system, control objectives and related controls, the suitability of the design of the controls to achieve the specified control

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

objectives, and the operating effectiveness of the controls; and

- b. A description of the service auditor's tests of the controls and the results thereof.
- (d) Service auditor means an auditor who, at the request of the service organisation, provides an assurance report on the controls of a service organisation.
- (e) Service organisation means a third-party organisation (or segment of a third-party organisation) that provides services to user entities that are part of those entities' information systems relevant to financial reporting.
- (f) Service organisation's system means the policies and procedures designed, implemented and maintained by the service organisation to provide user entities with the services covered by the service auditor's report.
- (g) Subservice organisation means a service organisation used by another service organisation to perform some of the services provided to user entities that are part of those user entities' information systems relevant to financial reporting.
- (h) User auditor means an auditor who audits and reports on the financial report of a user entity.
- (i) User entity means an entity that uses a service organisation and whose financial report is being audited.

## **Requirements**

### **Obtaining an Understanding of the Services Provided by a Service Organisation, Including Internal Control**

- 9. When obtaining an understanding of the user entity in accordance with ASA 315 (Redrafted),<sup>3</sup> the user auditor shall obtain an understanding of how a user entity uses the services of a service organisation in the user entity's operations, including: (Ref: Para. A1-A2)

---

<sup>3</sup> See ASA 315 (Revised and Redrafted), paragraph 11.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

- (a) The nature of the services provided by the service organisation and the significance of those services to the user entity, including the effect thereof on the user entity's internal control; (Ref: Para. A3-A5)
  - (b) The nature and materiality of the transactions processed or accounts or financial reporting processes affected by the service organisation; (Ref: Para. A6)
  - (c) The degree of interaction between the activities of the service organisation and those of the user entity; and (Ref: Para. A7)
  - (d) The nature of the relationship between the user entity and the service organisation, including the relevant contractual terms for the activities undertaken by the service organisation. (Ref: Para. A8-A11)
10. When obtaining an understanding of internal control relevant to the audit in accordance with ASA 315 (Revised and Redrafted),<sup>4</sup> the user auditor shall evaluate the design and implementation of relevant controls at the user entity that relate to the services provided by the service organisation, including those that are applied to the transactions processed by the service organisation. (Ref: Para. A12-A14)
11. The user auditor shall determine whether a sufficient understanding of the nature and significance of the services provided by the service organisation and their effect on the user entity's internal control relevant to the audit has been obtained to provide a basis for the identification and assessment of risks of material misstatement.
12. If the user auditor is unable to obtain a sufficient understanding from the user entity, the user auditor shall obtain that understanding from one or more of the following procedures: (Ref: Para. A15-A20)
- (a) Obtaining a type 1 or type 2 report, if available;
  - (b) Contacting the service organisation, through the user entity, to obtain specific information;
  - (c) Visiting the service organisation and performing procedures that will provide the necessary information about the relevant controls at the service organisation; or

---

<sup>4</sup> See ASA 315 (Revised and Redrafted), paragraph 12.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

- (d) Using another auditor to perform procedures that will provide the necessary information about the relevant controls at the service organisation.

*Using a Type 1 or Type 2 Report to Support the User Auditor's Understanding of the Service Organisation*

- 13. In determining the sufficiency and appropriateness of the audit evidence provided by a type 1 or type 2 report, the user auditor shall be satisfied as to: (Ref: Para. A21)
  - (a) The service auditor's professional competence and independence from the service organisation; and
  - (b) The adequacy of the standards under which the type 1 or type 2 report was issued.
- 14. If the user auditor plans to use a type 1 or type 2 report as audit evidence to support the user auditor's understanding about the design and implementation of controls at the service organisation, the user auditor shall: (Ref: Para. A22-A23)
  - (a) Evaluate whether the description and design of controls at the service organisation is at a date or for a period that is appropriate for the user auditor's purposes;
  - (b) Evaluate the sufficiency and appropriateness of the evidence provided by the report for the understanding of the user entity's internal control relevant to the audit; and
  - (c) Determine whether complementary user entity controls identified by the service organisation are relevant to the user entity and, if so, obtain an understanding of whether the user entity has designed and implemented such controls.

**Responding to the Assessed Risks of Material Misstatement**

- 15. In responding to assessed risks in accordance with ASA 330 (Revised and Redrafted), the user auditor shall: (Ref: Para. A24-A28)
  - (a) Determine whether sufficient appropriate audit evidence concerning the relevant financial statement assertions is available from records held at the user entity; and, if not,

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

- (b) Perform further audit procedures to obtain sufficient appropriate audit evidence or use another auditor to perform those procedures at the service organisation on the user auditor's behalf.

*Tests of Controls*

16. When the user auditor's risk assessment includes an expectation that controls at the service organisation are operating effectively, the user auditor shall obtain audit evidence about the operating effectiveness of those controls from one or more of the following procedures: (Ref: Para. A29-A30)
- (a) Obtaining a type 2 report, if available;
  - (b) Performing appropriate tests of controls at the service organisation; or
  - (c) Using another auditor to perform tests of controls at the service organisation on behalf of the user auditor.

*Using a Type 2 Report as Audit Evidence that Controls at the Service Organisation Are Operating Effectively*

17. If, in accordance with paragraph 16(a), the user auditor plans to use a type 2 report as audit evidence that controls at the service organisation are operating effectively, the user auditor shall determine whether the service auditor's report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor's risk assessment by: (Ref: Para. A31-A39)
- (a) Evaluating whether the description, design and operating effectiveness of controls at the service organisation is at a date or for a period that is appropriate for the user auditor's purposes;
  - (b) Determining whether complementary user entity controls identified by the service organisation are relevant to the user entity and, if so, obtaining an understanding of whether the user entity has designed and implemented such controls and, if so, testing their operating effectiveness;
  - (c) Evaluating the adequacy of the time period covered by the tests of controls and the time elapsed since the performance of the tests of controls; and

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

- (d) Evaluating whether the tests of controls performed by the service auditor and the results thereof, as described in the service auditor's report, are relevant to the assertions in the user entity's financial report and provide sufficient appropriate audit evidence to support the user auditor's risk assessment.

**Type 1 and Type 2 Reports that Exclude the Services of a Subservice Organisation**

- 18. If the user auditor plans to use a type 1 or a type 2 report that excludes the services provided by a subservice organisation and those services are relevant to the audit of the user entity's financial report, the user auditor shall apply the requirements of this Auditing Standard with respect to the services provided by the subservice organisation. (Ref: Para. A40)

**Fraud, Non-Compliance with Laws and Regulations and Uncorrected Misstatements in Relation to Activities at the Service Organisation**

- 19. The user auditor shall enquire of management of the user entity whether the service organisation has reported to the user entity, or whether the user entity is otherwise aware of, any fraud, non-compliance with laws and regulations or uncorrected misstatements affecting the financial report of the user entity. The user auditor shall evaluate how such matters affect the nature, timing and extent of the user auditor's further audit procedures, including the effect on the user auditor's conclusions and user auditor's report. (Ref: Para. A41)

**Reporting by the User Auditor**

- 20. The user auditor shall modify the opinion in the user auditor's report in accordance with ASA 705 (Revised and Redrafted)<sup>5</sup> if the user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organisation relevant to the audit of the user entity's financial report. (Ref: Para. A42)
- 21. The user auditor shall not refer to the work of a service auditor in the user auditor's report containing an unmodified opinion unless required by law or regulation to do so. If such reference is required by law or regulation, the user auditor's report shall indicate that the

**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

reference does not diminish the user auditor's responsibility for the audit opinion. (Ref: Para. A43)

22. If reference to the work of a service auditor is relevant to an understanding of a modification to the user auditor's opinion, the user auditor's report shall indicate that such reference does not diminish the user auditor's responsibility for that opinion. (Ref: Para. A44)

---

## **Application and Other Explanatory Material**

### **Obtaining an Understanding of the Services Provided by a Service Organisation, Including Internal Control**

*Sources of Information* (Ref: Para. 9)

- A1. Information on the nature of the services provided by a service organisation may be available from a wide variety of sources, such as:
- User manuals.
  - System overviews.
  - Technical manuals.
  - The contract or service level agreement between the user entity and the service organisation.
  - Reports by service organisations, internal auditors or regulatory authorities on controls at the service organisation.
  - Reports by the service auditor, including management letters, if available.
- A2. Knowledge obtained through the user auditor's experience with the service organisation, for example through experience with other audit engagements, may also be helpful in obtaining an understanding of the nature of the services provided by the service organisation. This may be particularly helpful if the services and controls at the service organisation over those services are highly standardised.

*Nature of the Services Provided by the Service Organisation* (Ref: Para. 9(a))

- A3. A user entity may use a service organisation such as one that processes transactions and maintains related accountability, or records transactions and processes related data. Service organisations that provide such services include, for example, bank trust departments that invest and service assets for employee benefit plans or for others; mortgage bankers that service mortgages for others; and application service providers that provide packaged

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

software applications and a technology environment that enables customers to process financial and operational transactions.

- A4. Examples of service organisation services that are relevant to the audit include:
- Maintenance of the user entity's accounting records.
  - Management of assets.
  - Initiating, recording or processing transactions as agent of the user entity.

Considerations Specific to Smaller Entities

- A5. Smaller entities may use external bookkeeping services ranging from the processing of certain transactions (e.g., payment of payroll taxes) and maintenance of their accounting records to the preparation of their financial report. The use of such a service organisation for the preparation of its financial report does not relieve management of the smaller entity and, where appropriate, those charged with governance of their responsibilities for the financial report.<sup>6</sup>

*Nature and Materiality of Transactions Processed by the Service Organisation* (Ref: Para. 9(b))

- A6. A service organisation may establish policies and procedures that affect the user entity's internal control. These policies and procedures are at least in part physically and operationally separate from the user entity. The significance of the controls of the service organisation to those of the user entity depends on the nature of the services provided by the service organisation, including the nature and materiality of the transactions it processes for the user entity. In certain situations, the transactions processed and the accounts affected by the service organisation may not appear to be material to the user entity's financial report, but the nature of the transactions processed may be significant and the user auditor may determine that an understanding of those controls is necessary in the circumstances.

---

<sup>6</sup> See ASA 200 (Revised and Redrafted) *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Australian Auditing Standards*, paragraphs 4 and A2-A3.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

*The Degree of Interaction between the Activities of the Service Organisation and the User Entity* (Ref: Para. 9(c))

- A7. The significance of the controls of the service organisation to those of the user entity also depends on the degree of interaction between its activities and those of the user entity. The degree of interaction refers to the extent to which a user entity is able to and elects to implement effective controls over the processing performed by the service organisation. For example, a high degree of interaction exists between the activities of the user entity and those at the service organisation when the user entity authorises transactions and the service organisation processes and does the accounting for those transactions. In these circumstances, it may be practicable for the user entity to implement effective controls over those transactions. On the other hand, when the service organisation initiates or initially records, processes, and does the accounting for the user entity's transactions, there is a lower degree of interaction between the two organisations. In these circumstances, the user entity may be unable to, or may elect not to, implement effective controls over these transactions at the user entity and may rely on controls at the service organisation.

*Nature of the Relationship between the User Entity and the Service Organisation* (Ref: Para. 9(d))

- A8. The contract or service level agreement between the user entity and the service organisation may provide for matters such as:
- The information to be provided to the user entity and responsibilities for initiating transactions relating to the activities undertaken by the service organisation;
  - The application of requirements of regulatory bodies concerning the form of records to be maintained, or access to them;
  - The indemnification, if any, to be provided to the user entity in the event of a performance failure;
  - Whether the service organisation will provide a report on its controls and, if so, whether such report would be a type 1 or type 2 report;
  - Whether the user auditor has rights of access to the accounting records of the user entity maintained by the

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

service organisation and other information necessary for the conduct of the audit; and

- Whether the agreement allows for direct communication between the user auditor and the service auditor.

A9. There is a direct relationship between the service organisation and the user entity and between the service organisation and the service auditor. These relationships do not necessarily create a direct relationship between the user auditor and the service auditor. When there is no direct relationship between the user auditor and the service auditor, communications between the user auditor and the service auditor are usually conducted through the user entity and the service organisation. A direct relationship may also be created between a user auditor and a service auditor, taking into account the relevant ethical and confidentiality considerations. A user auditor, for example, may use a service auditor to perform procedures on the user auditor's behalf, such as:

- (a) Tests of controls at the service organisation; or
- (b) Substantive procedures on the user entity's financial statement transactions and balances maintained by a service organisation.

**Considerations Specific to Public Sector Entities**

A10. Public sector auditors generally have broad rights of access established by legislation. However, there may be situations where such rights of access are not available, for example when the service organisation is located in a different jurisdiction. In such cases, a public sector auditor may need to obtain an understanding of the legislation applicable in the different jurisdiction to determine whether appropriate access rights can be obtained. A public sector auditor may also obtain or ask the user entity to incorporate rights of access in any contractual arrangements between the user entity and the service organisation.

A11. Public sector auditors may also use another auditor to perform tests of controls or substantive procedures in relation to compliance with law, regulation or other authority.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

*Understanding the Controls Relating to Services Provided by the Service Organisation* (Ref: Para. 10)

- A12. The user entity may establish controls over the service organisation's services that may be tested by the user auditor and that may enable the user auditor to conclude that the user entity's controls are operating effectively for some or all of the related assertions, regardless of the controls in place at the service organisation. If a user entity, for example, uses a service organisation to process its payroll transactions, the user entity may establish controls over the submission and receipt of payroll information that could prevent or detect material misstatements. These controls may include:
- Comparing the data submitted to the service organisation with reports of information received from the service organisation after the data has been processed.
  - Recomputing a sample of the payroll amounts for clerical accuracy and reviewing the total amount of the payroll for reasonableness.
- A13. In this situation, the user auditor may perform tests of the user entity's controls over payroll processing that would provide a basis for the user auditor to conclude that the user entity's controls are operating effectively for the assertions related to payroll transactions.
- A14. As noted in ASA 315 (Redrafted),<sup>7</sup> in respect of some risks, the user auditor may judge that it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures. Such risks may relate to the inaccurate or incomplete recording of routine and significant classes of transactions and account balances, the characteristics of which often permit highly automated processing with little or no manual intervention. Such automated processing characteristics may be particularly present when the user entity uses service organisations. In such cases, the user entity's controls over such risks are relevant to the audit and the user auditor is required to obtain an understanding of, and to evaluate, such controls in accordance with paragraphs 9 and 10 of this Auditing Standard.

---

<sup>7</sup> See ASA 315 (Revised and Redrafted), paragraph 30.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

*Further Procedures When a Sufficient Understanding Cannot Be Obtained from the User Entity* (Ref: Para. 12)

- A15. The user auditor's decision as to which procedure, individually or in combination, in paragraph 12 to undertake, in order to obtain the information necessary to provide a basis for the identification and assessment of the risks of material misstatement in relation to the user entity's use of the service organisation, may be influenced by such matters as:
- The size of both the user entity and the service organisation;
  - The complexity of the transactions at the user entity and the complexity of the services provided by the service organisation;
  - The location of the service organisation (for example, the user auditor may decide to use another auditor to perform procedures at the service organisation on the user auditor's behalf if the service organisation is in a remote location);
  - Whether the procedure(s) is expected to effectively provide the user auditor with sufficient appropriate audit evidence; and
  - The nature of the relationship between the user entity and the service organisation.
- A16. A service organisation may engage a service auditor to report on the description and design of its controls (type 1 report) or on the description and design of its controls and their operating effectiveness (type 2 report). Type 1 or type 2 reports may be issued under [proposed] International Standard on Assurance Engagements (ISAE) 3402<sup>8</sup> or under standards established by an authorised or recognised standards setting organisation (which may identify them by different names, such as Type A or Type B reports).
- A17. The availability of a type 1 or type 2 report will generally depend on whether the contract between a service organisation and a user entity includes the provision of such a report by the service organisation. A service organisation may also elect, for practical reasons, to make a

---

<sup>8</sup> [Proposed] ISAE 3402 *Assurance Reports on Controls at a Third-Party Service Organisation*.

**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

type 1 or type 2 report available to the user entities. However, in some cases, a type 1 or type 2 report may not be available to user entities.

- A18. In some circumstances, a user entity may outsource one or more significant business units or functions, such as its entire tax planning and compliance functions, or finance and accounting or the control function to one or more service organisations. As a report on controls at the service organisation may not be available in these circumstances, visiting the service organisation may be the most effective procedure for the user auditor to gain an understanding of controls at the service organisation, as there is likely to be direct interaction of management of the user entity with management at the service organisation.
- A19. Another auditor may be used to perform procedures that will provide the necessary information about the relevant controls at the service organisation. If a type 1 or type 2 report has been issued, the user auditor may use the service auditor to perform these procedures as the service auditor has an existing relationship with the service organisation. The user auditor using the work of another auditor may find the guidance in ASA 600 (Revised and Redrafted)<sup>9</sup> useful as it relates to understanding another auditor (including that auditor's independence and professional competence), involvement in the work of another auditor in planning the nature, extent and timing of such work, and in evaluating the sufficiency and appropriateness of the audit evidence obtained.
- A20. A user entity may use a service organisation that in turn uses a subservice organisation to provide some of the services provided to a user entity that are part of the user entity's information system relevant to financial reporting. The subservice organisation may be a separate entity from the service organisation or may be related to the service organisation. A user auditor may need to consider controls at the subservice organisation. In situations where one or more subservice organisations are used, the interaction between the activities of the user entity and those of the service organisation is expanded to include the interaction between the user entity, the service organisation and the subservice organisations. The degree of this interaction, as well as the nature and materiality of the

---

<sup>9</sup> See ASA 600 *Special Considerations—Audits of a Group Financial Report (Including the Work of Component Auditors)* (Revised and Redrafted), paragraph 2, states: "An auditor may find this Auditing Standard, applied as necessary in the circumstances, useful when that auditor involves other auditors in the audit of a financial report that is not a group financial report ..." See also paragraph 19 of ASA 600 (Revised and Redrafted).

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

transactions processed by the service organisation and the subservice organisations are the most important factors for the user auditor to consider in determining the significance of the service organisation's and subservice organisation's controls to the user entity's controls.

*Using a Type 1 or Type 2 Report to Support the User Auditor's Understanding of the Service Organisation* (Ref: Para. 13-14)

A21. The user auditor may make enquiries about the service auditor to the service auditor's professional organisation or other practitioners and enquire whether the service auditor is subject to regulatory oversight. The service auditor may be practicing in a jurisdiction where different standards are followed in respect of reports on controls at a service organisation, and the user auditor may obtain information about the standards used by the service auditor from the standard setting organisation.

A22. A type 1 or type 2 report, along with information about the user entity, may assist the user auditor in obtaining an understanding of:

- (a) The aspects of controls at the service organisation that may affect the processing of the user entity's transactions, including the use of subservice organisations;
- (b) The flow of significant transactions through the service organisation to determine the points in the transaction flow where material misstatements in the user entity's financial report could occur;
- (c) The control objectives at the service organisation that are relevant to the user entity's financial statement assertions; and
- (d) Whether controls at the service organisation are suitably designed and implemented to prevent or detect processing errors that could result in material misstatements in the user entity's financial report.

A type 1 or type 2 report may assist the user auditor in obtaining a sufficient understanding to identify and assess the risks of material misstatement. A type 1 report, however, does not provide any evidence of the operating effectiveness of the relevant controls.

A23. A type 1 or type 2 report that is as of a date or for a period that is outside of the reporting period of a user entity may assist the user

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

auditor in obtaining a preliminary understanding of the controls implemented at the service organisation if the report is supplemented by additional current information from other sources. If the service organisation's description of controls is as of a date or for a period that precedes the beginning of the period under audit, the user auditor may perform procedures to update the information in a type 1 or type 2 report, such as:

- Discussing the changes at the service organisation with user entity personnel who would be in a position to know of such changes;
- Reviewing current documentation and correspondence issued by the service organisation; or
- Discussing the changes with service organisation personnel.

**Responding to the Assessed Risks of Material Misstatement** (Ref: Para. 15)

- A24. Whether the use of a service organisation increases a user entity's risk of material misstatement depends on the nature of the services provided and the controls over these services; in some cases, the use of a service organisation may decrease a user entity's risk of material misstatement, particularly if the user entity itself does not possess the expertise necessary to undertake particular activities, such as initiating, processing, and recording transactions, or does not have adequate resources (e.g., an IT system).
- A25. When the service organisation maintains material elements of the accounting records of the user entity, direct access to those records may be necessary in order for the user auditor to obtain sufficient appropriate audit evidence relating to the operations of controls over those records or to substantiate transactions and balances recorded in them, or both. Such access may involve either physical inspection of records at the service organisation's premises or interrogation of records maintained electronically from the user entity or another location, or both. Where direct access is achieved electronically, the user auditor may thereby obtain evidence as to the adequacy of controls operated by the service organisation over the completeness and integrity of the user entity's data for which the service organisation is responsible.
- A26. In determining the nature and extent of audit evidence to be obtained in relation to balances representing assets held or transactions

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

undertaken by a service organisation on behalf of the user entity, the following procedures may be considered by the user auditor:

- (a) Inspecting records and documents held by the user entity: the reliability of this source of evidence is determined by the nature and extent of the accounting records and supporting documentation retained by the user entity. In some cases, the user entity may not maintain independent detailed records or documentation of specific transactions undertaken on its behalf.
- (b) Inspecting records and documents held by the service organisation: the user auditor's access to the records of the service organisation may be established as part of the contractual arrangements between the user entity and the service organisation. The user auditor may also use another auditor, on its behalf, to gain access to the user entity's records maintained by the service organisation.
- (c) Obtaining confirmations of balances and transactions from the service organisation: where the user entity maintains independent records of balances and transactions, confirmation from the service organisation corroborating the user entity's records may constitute reliable audit evidence concerning the existence of the transactions and assets concerned. For example, when multiple service organisations are used, such as an investment manager and a custodian, and these service organisations maintain independent records, the user auditor may confirm balances with these organisations in order to compare this information with the independent records of the user entity.

If the user entity does not maintain independent records, information obtained in confirmations from the service organisation is merely a statement of what is reflected in the records maintained by the service organisation. Therefore, such confirmations do not, taken alone, constitute reliable audit evidence. In these circumstances, the user auditor may consider whether an alternative source of independent evidence can be identified.

- (d) Performing analytical procedures on the records maintained by the user entity or on the reports received from the service organisation: the effectiveness of analytical

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

procedures is likely to vary by assertion and will be affected by the extent and detail of information available.

- A27. Another auditor may perform procedures that are substantive in nature for the benefit of user auditors. Such an engagement may involve the performance, by another auditor, of procedures agreed upon by the user entity and its user auditor and by the service organisation and its service auditor. The findings resulting from the procedures performed by another auditor are reviewed by the user auditor to determine whether they constitute sufficient appropriate audit evidence. In addition, there may be requirements imposed by governmental authorities or through contractual arrangements whereby a service auditor performs designated procedures that are substantive in nature. The results of the application of the required procedures to balances and transactions processed by the service organisation may be used by user auditors as part of the evidence necessary to support their audit opinions. In these circumstances, it may be useful for the user auditor and the service auditor to agree, prior to the performance of the procedures, to the audit documentation or access to audit documentation that will be provided to the user auditor.
- A28. In certain circumstances, in particular when a user entity outsources some or all of its finance function to a service organisation, the user auditor may face a situation where a significant portion of the audit evidence resides at the service organisation. Substantive procedures may need to be performed at the service organisation by the user auditor or another auditor on its behalf. A service auditor may provide a type 2 report and, in addition, may perform substantive procedures on behalf of the user auditor. The involvement of another auditor does not alter the user auditor's responsibility to obtain sufficient appropriate audit evidence to afford a reasonable basis to support the user auditor's opinion. Accordingly, the user auditor's consideration of whether sufficient appropriate audit evidence has been obtained and whether the user auditor needs to perform further substantive procedures includes the user auditor's involvement with, or evidence of, the direction, supervision and performance of the substantive procedures performed by another auditor.

*Tests of Controls* (Ref: Para. 16)

- A29. The user auditor is required by ASA 330 (Revised and Redrafted)<sup>10</sup> to design and perform tests of controls to obtain sufficient

---

<sup>10</sup> See ASA 330 (Revised and Redrafted), paragraph 8.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

appropriate audit evidence as to the operating effectiveness of relevant controls in certain circumstances. In the context of a service organisation, this requirement applies when:

- (a) The user auditor's assessment of risks of material misstatement includes an expectation that the controls at the service organisation are operating effectively (i.e., the user auditor intends to rely on the operating effectiveness of controls at the service organisation in determining the nature, timing and extent of substantive procedures); or
- (b) Substantive procedures alone, or in combination with tests of the operating effectiveness of controls at the user entity, cannot provide sufficient appropriate audit evidence at the assertion level.

A30. If a type 2 report is not available, a user auditor may contact the service organisation, through the user entity, to request that a service auditor be engaged to provide a type 2 report that includes tests of the operating effectiveness of the relevant controls or the user auditor may use another auditor to perform procedures at the service organisation that test the operating effectiveness of those controls. A user auditor may also visit the service organisation and perform tests of relevant controls if the service organisation agrees to it. The user auditor's risk assessments are based on the combined evidence provided by the work of another auditor and the user auditor's own procedures.

Using a Type 2 Report as Audit Evidence that Controls at the Service Organisation Are Operating Effectively (Ref: Para. 17)

A31. A type 2 report may be intended to satisfy the needs of several different user auditors; therefore tests of controls and results described in the service auditor's report may not be relevant to assertions that are significant in the user entity's financial report. The relevant tests of controls and results are evaluated to determine that the service auditor's report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor's risk assessment. In doing so, the user auditor may consider the following factors:

- (a) The time period covered by the tests of controls and the time elapsed since the performance of the tests of controls;

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

- (b) The scope of the service auditor's work and the services and processes covered, the controls tested and tests that were performed, and the way in which tested controls relate to the user entity's controls; and
  - (c) The results of those tests of controls and the service auditor's opinion on the operating effectiveness of the controls.
- A32. For certain assertions, the shorter the period covered by a specific test and the longer the time elapsed since the performance of the test, the less audit evidence the test may provide. In comparing the period covered by the type 2 report to the user entity's financial reporting period, the user auditor may conclude that the type 2 report offers less audit evidence if there is little overlap between the period covered by the type 2 report and the period for which the user auditor intends to rely on the report. When this is the case, a type 2 report covering a preceding or subsequent period may provide additional audit evidence. In other cases, the user auditor may determine it is necessary to perform, or use another auditor to perform, tests of controls at the service organisation in order to obtain sufficient appropriate audit evidence about the operating effectiveness of those controls.
- A33. It may also be necessary for the user auditor to obtain additional evidence about significant changes to the relevant controls at the service organisation outside of the period covered by the type 2 report or determine additional audit procedures to be performed. Relevant factors in determining what additional audit evidence to obtain about controls at the service organisation that were operating outside of the period covered by the service auditor's report may include:
- The significance of the assessed risks of material misstatement at the assertion level;
  - The specific controls that were tested during the interim period, and significant changes to them since they were tested, including changes in the information system, processes, and personnel;
  - The degree to which audit evidence about the operating effectiveness of those controls was obtained;
  - The length of the remaining period;

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

- The extent to which the user auditor intends to reduce further substantive procedures based on the reliance on controls; and
  - The effectiveness of the control environment and monitoring of controls at the user entity.
- A34. Additional audit evidence may be obtained, for example, by extending tests of controls over the remaining period or testing the user entity's monitoring of controls.
- A35. If the service auditor's testing period is completely outside the user entity's financial reporting period, the user auditor will be unable to rely on such tests for the user auditor to conclude that the user entity's controls are operating effectively because they do not provide current audit period evidence of the effectiveness of the controls, unless other procedures are performed.
- A36. In certain circumstances, a service provided by the service organisation may be designed with the assumption that certain controls will be implemented by the user entity. For example, the service may be designed with the assumption that the user entity will have controls in place for authorising transactions before they are sent to the service organisation for processing. In such a situation, the service organisation's description of controls may include a description of those complementary user entity controls. The user auditor considers whether those complementary user entity controls are relevant to the service provided to the user entity.
- A37. If the user auditor believes that the service auditor's report may not provide sufficient appropriate audit evidence, for example, if a service auditor's report does not contain a description of the service auditor's tests of controls and results thereon, the user auditor may supplement the understanding of the service auditor's procedures and conclusions by contacting the service organisation, through the user entity, to request a discussion with the service auditor about the scope and results of the service auditor's work. Also, if the user auditor believes it is necessary, the user auditor may contact the service organisation, through the user entity, to request that the service auditor perform procedures at the service organisation. Alternatively, the user auditor, or another auditor at the request of the user auditor, may perform such procedures.
- A38. The service auditor's type 2 report identifies results of tests, including exceptions and other information that could affect the user

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

auditor's conclusions. Exceptions noted by the service auditor or a modified opinion in the service auditor's type 2 report do not automatically mean that the service auditor's type 2 report will not be useful for the audit of the user entity's financial report in assessing the risks of material misstatement. Rather, the exceptions and the matter giving rise to a modified opinion in the service auditor's type 2 report are considered in the user auditor's assessment of the testing of controls performed by the service auditor. In considering the exceptions and matters giving rise to a modified opinion, the user auditor may discuss such matters with the service auditor. Such communication is dependent upon the user entity contacting the service organisation, and obtaining the service organisation's approval for the communication to take place.

Communication of deficiencies in internal control identified during the audit

A39. The user auditor is required to communicate in writing significant deficiencies identified during the audit to both management and those charged with governance on a timely basis.<sup>11</sup> The user auditor is also required to communicate to management at an appropriate level of responsibility on a timely basis other deficiencies in internal control identified during the audit that, in the user auditor's professional judgement, are of sufficient importance to merit management's attention.<sup>12</sup> Matters that the user auditor may identify during the audit and may communicate to management and those charged with governance of the user entity include:

- Any monitoring of controls that could be implemented by the user entity, including those identified as a result of obtaining a type 1 or type 2 report;
- Instances where complementary user entity controls are noted in the type 1 or type 2 report and are not implemented at the user entity; and
- Controls that may be needed at the service organisation that do not appear to have been implemented or that are not specifically covered by a type 2 report.

---

<sup>11</sup> See ASA 265 (Revised and Redrafted) *Communicating Deficiencies in Internal Control to Those Charged with Governance and Management*, paragraphs 9-10.

<sup>12</sup> See ASA 265 (Revised and Redrafted), paragraph 10.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

**Type 1 and Type 2 Reports that Exclude the Services of a Subservice Organisation** (Ref: Para. 18)

A40. If a service organisation uses a subservice organisation, the service auditor's report may either include or exclude the subservice organisation's relevant control objectives and related controls in the service organisation's description of its system and in the scope of the service auditor's engagement. These two methods of reporting are known as the inclusive method and the carve-out method, respectively. If the type 1 or type 2 report excludes the controls at a subservice organisation, and the services provided by the subservice organisation are relevant to the audit of the user entity's financial report, the user auditor is required to apply the requirements of this Auditing Standard in respect of the subservice organisation. The nature and extent of work to be performed by the user auditor regarding the services provided by a subservice organisation depend on the nature and significance of those services to the user entity and the relevance of those services to the audit. The application of the requirement in paragraph 9 assists the user auditor in determining the effect of the subservice organisation and the nature and extent of work to be performed.

**Fraud, Non-Compliance with Laws and Regulations and Uncorrected Misstatements in Relation to Activities at the Service Organisation** (Ref: Para. 19)

A41. A service organisation may be required under the terms of the contract with user entities to disclose to affected user entities any fraud, non-compliance with laws and regulations or uncorrected misstatements attributable to the service organisation's management or employees. As required by paragraph 19, the user auditor makes enquiries of the user entity management regarding whether the service organisation has reported any such matters and evaluates whether any matters reported by the service organisation affect the nature, timing and extent of the user auditor's further audit procedures. In certain circumstances, the user auditor may require additional information to perform this evaluation, and may request the user entity to contact the service organisation to obtain the necessary information.

**Reporting by the User Auditor** (Ref: Para. 20)

A42. When a user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organisation

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

relevant to the audit of the user entity's financial report, a limitation on the scope of the audit exists. This may be the case when:

- The user auditor is unable to obtain a sufficient understanding of the services provided by the service organisation and does not have a basis for the identification and assessment of the risks of material misstatement;
- A user auditor's risk assessment includes an expectation that controls at the service organisation are operating effectively and the user auditor is unable to obtain sufficient appropriate audit evidence about the operating effectiveness of these controls; or
- Sufficient appropriate audit evidence is only available from records held at the service organisation, and the user auditor is unable to obtain direct access to these records.

Whether the user auditor expresses a qualified opinion or disclaims an opinion depends on the user auditor's conclusion as to whether the possible effects on the financial report are material or pervasive.

*Reference to the Work of a Service Auditor* (Ref: Para. 21-22)

- A43. In some cases, law or regulation may require a reference to the work of a service auditor in the user auditor's report, for example, for the purposes of transparency in the public sector. In such circumstances, the user auditor may need the consent of the service auditor before making such a reference.
- A44. The fact that a user entity uses a service organisation does not alter the user auditor's responsibility under ISAs to obtain sufficient appropriate audit evidence to afford a reasonable basis to support the user auditor's opinion. Therefore, the user auditor does not make reference to the service auditor's report as a basis, in part, for the user auditor's opinion on the user entity's financial report. However, when the user auditor expresses a modified opinion because of a modified opinion in a service auditor's report, the user auditor is not precluded from referring to the service auditor's report if such reference assists in explaining the reason for the user auditor's modified opinion. In such circumstances, the user auditor may need the consent of the service auditor before making such a reference.

**Proposed Auditing Standard ASA 402**  
***Audit Considerations Relating to an Entity Using a Service Organisation***  
**(Revised and Redrafted) (Re-issuance of ASA 402)**

---

**Conformity with International Standards on Auditing**

This Auditing Standard conforms with International Standard on Auditing ISA 402 *Audit Considerations Relating to an Entity Using a Service Organization* (Revised and Redrafted), issued by the International Auditing and Assurance Standards Board (IAASB), an independent standard-setting board of the International Federation of Accountants (IFAC).

Paragraphs that have been added to this Auditing Standard (and do not appear in the text of the equivalent ISA) are identified with the prefix “Aus”.

Compliance with this Auditing Standard enables compliance with ISA 402.

**Tables of Differences — ASA 402 (Revised and Redrafted) and Extant ASA 402**

**Underlying Standard**

ISA402 *Audit Considerations Relating to an Entity Using a Service Organization* (Revised and Redrafted) is used as the underlying Auditing Standard for the purpose of re-drafting this proposed Auditing Standard. The underlying Auditing Standard will be amended for the following matters:

- Australian Laws and Regulations (including the *Corporations Act 2001*);
- Changes considered necessary because this Auditing Standard is a legislative instrument; and
- Changes considered necessary in the public interest.

**Summary of Main Differences — ASA 402 (Revised and Redrafted) and Extant ASA 402**

The table below details the main differences (excluding editorial amendments) between this proposed Auditing Standard and extant ASA 402.

Item #	ASA (Revised and Redrafted) Para. #	ASA (Revised and Redrafted) Requirements	Commentary
<b>Objectives</b>			
1	7	The objectives of the user auditor, when the user entity uses the services of a service organisation, are: <ul style="list-style-type: none"> <li>(a) To obtain an understanding of the nature and significance of the services provided by the service organisation and their effect on the user entity’s internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement; and</li> <li>(b) To design and perform audit procedures responsive to those risks.</li> </ul>	New Objectives  However, consistent with extant requirements at paras 5 and 9.

		(b) Performing appropriate tests of controls at the service organisation; or (c) Using another auditor to perform tests of controls at the service organisation on behalf of the user auditor.	equivalent guidance at extant ASA 402 paras 18 and 26
9	17	<p>If, in accordance with paragraph 16(a), the user auditor plans to use a type 2 report as audit evidence that controls at the service organisation are operating effectively, the user auditor shall determine whether the service auditor’s report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor’s risk assessment by:</p> <p>(a) Evaluating whether the description, design and operating effectiveness of controls at the service organisation is at a date or for a period that is appropriate for the user auditor’s purposes;</p> <p>(b) Determining whether complementary user entity controls identified by the service organisation are relevant to the user entity and, if so, obtaining an understanding of whether the user entity has designed and implemented such controls and, if so, testing their operating effectiveness;</p> <p>(c) Evaluating the adequacy of the time period covered by the tests of controls and the time elapsed since the performance of the tests of controls; and</p> <p>(d) Evaluating whether the tests of controls performed by the service auditor and the results thereof, as described in the service auditor’s report, are relevant to the assertions in the user entity’s financial reports and provide sufficient appropriate audit evidence to support the user auditor’s risk assessment.</p>	<p>Shaded text — Requirement is more comprehensive and expressed differently to the extant ASA equivalent, but has similar meaning.</p> <p>[Extant ASA 402 para 21 and 24—equivalent Explanatory Guidance].</p> <p>Unshaded text — new requirements</p>

Item #	ASA (Revised and Redrafted) Para. #	ASA (Revised and Redrafted) Requirements	Commentary
<b>Type 1 and Type 2 Reports that Exclude the Services of a Subservice Organisation</b>			
10	18	If the user auditor plans to use a type 1 or a type 2 report that excludes the services provided by a subservice organisation and those services are relevant to the audit of the user entity's financial report, the user auditor shall apply the requirements of this Auditing Standard with respect to the services provided by the subservice organisation.	New Requirement
<b>Fraud, Non-Compliance with Laws and Regulations and Uncorrected Misstatements in Relation to Activities at the Service Organisation</b>			
11	19	The user auditor shall enquire of management of the user entity whether the service organisation has reported to the user entity, or whether the user entity is otherwise aware of, any fraud, non-compliance with laws and regulations or uncorrected misstatements affecting the financial report of the user entity. The user auditor shall evaluate how such matters affect the nature, timing and extent of the user auditor's further audit procedures, including the effect on the user auditor's conclusions and user auditor's report.	New Requirement
<b>Reporting by the User Auditor</b>			
12	20	The user auditor shall modify the opinion in the user auditor's report in accordance with ASA 705 (Revised and Redrafted) if the user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organisation relevant to the audit of the user entity's financial report.	Elevation of extant ASA Explanatory Guidance [Extant ASA 402 para 25 — equivalent Explanatory Guidance]
13	21	The user auditor shall not refer to the work of a service auditor in the user auditor's report containing an unmodified opinion unless required by law or regulation to do so. If such reference is required by law or regulation, the user auditor's report shall indicate that the reference does not diminish the user auditor's responsibility for the audit opinion.	Elevation of extant ASA Explanatory Guidance [Extant ASA 402 para 27 — equivalent Explanatory Guidance]

Item #	ASA (Revised and Redrafted) Para. #	ASA (Revised and Redrafted) Requirements	Commentary
14	22	If reference to the work of a service auditor is relevant to an understanding of a modification to the user auditor’s opinion, the user auditor’s report shall indicate that such reference does not diminish the user auditor’s responsibility for that opinion.	New Requirement
