Reasons for Issuing Auditing Standard ASA 330 *The Auditor's Responses to Assessed Risks*

The Auditing and Assurance Standards Board (AUASB) issues Auditing Standard ASA 330 *The Auditor's Responses to Assessed Risks* pursuant to the requirements of the legislative provisions and the Strategic Direction explained below.

The AUASB is an independent statutory board of the Australian Government established under section 227A of the *Australian Securities and Investments Commission Act 2001*, as amended (ASIC Act). Under section 336 of the *Corporations Act 2001* (the Act), the AUASB may make Auditing Standards for the purposes of the corporations legislation. These Auditing Standards are legislative instruments under the *Legislative Instruments Act 2003*.

Under the Strategic Direction given to the AUASB by the Financial Reporting Council (FRC), the AUASB is required to have regard to any programme initiated by the International Auditing and Assurance Standards Board (IAASB) for the revision and enhancement of the International Standards on Auditing (ISAs) and to make appropriate consequential amendments to the Australian Auditing Standards. The IAASB has undertaken a programme to redraft, and in some cases, revise, in "clarity" format, the entire suite of ISAs. Accordingly, the AUASB has decided to revise and redraft the Australian Auditing Standards using the equivalent redrafted ISAs.

The Auditing Standard conforms with ISA 330 *The Auditor's Responses to Assessed Risks*.

Operative Date

ASA 330 *The Auditor's Responses to Assessed Risks* is operative for financial reporting periods commencing on or after 1 January 2010.

Purpose of Auditing Standard ASA 330 *The Auditor's Responses to Assessed Risks*

The purpose of the Auditing Standard is to establish requirements and to provide application and other explanatory material to auditors regarding the auditor's responsibility to design and implement responses to the assessed risks of material misstatement in a financial report audit.

Explanatory Statement ASA 330 *The Auditor's Responses to Assessed Risks*

Main Features

The Auditing Standard requires the auditor to:

- (a) determine overall responses to address the assessed risks of material misstatement at the financial report level;
- (b) design and perform further audit procedures to respond to the assessed risks of material misstatement at the assertion level;
- (c) test controls if:
 - the auditor's assessment of risk includes an expectation that controls are operating effectively; and
 - substantive procedures alone cannot provide sufficient appropriate audit evidence;
- (d) design and perform substantive procedures for:
 - each material class of transaction, account balance and disclosure;
 - the financial report closing process; and
 - any identified significant risks;
- (e) assess whether the overall presentation of the financial report is in accordance with the applicable financial reporting framework;
- (f) evaluate the sufficiency and appropriateness of audit evidence obtained; and
- (g) document certain matters in respect of procedures performed in response to assessed risks.

Preamble and Overall Objectives

ASA 330 is to be read in conjunction with ASA 101 *Preamble to Australian Auditing Standards*, which sets out the intentions of the AUASB on how the Australian Auditing Standards, operative for financial reporting periods commencing on or after 1 January 2010, are to be understood, interpreted and applied. ASA 330 is to be read also in conjunction with ASA 200 *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Australian Auditing Standards*.

Process of making Australian Auditing Standards

The AUASB's Strategic Direction, *inter alia*, provides that the AUASB develop Australian Auditing Standards that:

- have a clear public interest focus and are of the highest quality;
- use the International Standards on Auditing (ISAs) of the International Auditing and Assurance Standards Board (IAASB) as the underlying standards;
- conform with the Australian regulatory environment; and
- are capable of enforcement.

In implementing the FRC's Strategic Direction, the AUASB has undertaken a process of revision and redrafting of the Australian Auditing Standards that has:

- updated the form, layout and content of the Australian Auditing Standards;
- addressed the legal enforceability of mandatory obligations;
- maintained clarity of the auditor's obligations;
- incorporated appropriate references to Australian laws and regulations;
- clearly identified, by use of the prefix "Aus", AUASB additions to paragraphs in the requirements or the application and other explanatory material; and
- included other amendments as necessary.

Consultation Process prior to issuing the Auditing Standard

The AUASB has consulted publicly as part of its due process in developing the Auditing Standard. Exposure Draft ED 08/08 *Proposed Auditing Standard: The Auditor's Responses to Assessed Risks* (Re-issuance of ASA 330 *The Auditor's Procedures in Response to Assessed Risks*), was issued on 31 July 2008 with a 30 day comment period.

Explanatory Statement ASA 330 *The Auditor's Responses to Assessed Risks*

As an integral part of its consultation with the public, the AUASB sought comments on specific questions including:

- the completeness and accuracy of references in the Auditing Standard to relevant laws and regulations;
- the significant costs, if any, and benefits, of compliance with any additional requirements under the Auditing Standard; and
- whether or not there exist any matters of public interest affecting the issuance of the Auditing Standard.

Submissions were received by the AUASB and these were considered as part of the development and finalisation of the Auditing Standard.

Regulation Impact Statement

A *Regulation Impact Statement* (RIS) has been prepared in connection with the redrafting of Australian Auditing Standards in “clarity” format, including ASA 330 *The Auditor's Responses to Assessed Risks*.

The RIS considered both expected benefits and expected costs of the introduction of clarified auditing standards, including comments provided by stakeholders during the redrafting process. It concluded that expected benefits to users of audit services, users of audit reports, auditors and the Australian economy in general are, on balance, likely to outweigh expected costs.

Main Differences from ASA 330 *The Auditor's Procedures in Response to Assessed Risks* (April 2006)

The main differences between the Auditing Standard and the Auditing Standard that it supersedes, ASA 330 *The Auditor's Procedures in Response to Assessed Risks* (April 2006), are:

1. Auditing Standard ASA 330 is written in the “clarity” format using the equivalent International Standard on Auditing (ISA 330 *The Auditor's Responses to Assessed Risks*) as the underlying Auditing Standard. Consequently, the format, layout, and paragraph numbering styles are different from the extant Auditing Standard.

Explanatory Statement ASA 330 *The Auditor's Responses to Assessed Risks*

2. The following requirement included in the Auditing Standard is in part, or full, additional to the extant Auditing Standard:
 - The auditor's documentation shall demonstrate that the financial report agrees or reconciles with the underlying accounting records. (Ref: Para. 30)
3. Certain guidance material in the extant Auditing Standard has been elevated to requirements.
4. To improve clarity, certain requirements and guidance in the extant Auditing Standard have been re-written, however, the equivalent meanings have been retained.
